PROJECTS

UI & UX Designer — CareerFoundry Projects

BANQ | Personal Finance App

- Designed a money saving app integrated with AI by undergoing research on various competitive apps, generated ideas into ideation through sketches, designed wireframes and conducted productive user-testing to test out the app's design and feel, allowing users to optimally save their money.

Seedly | Plant Care and E-Commerce App

- Focused on visual design skills by developing high-fidelity wireframes for a plant-care app and store (iOS and Android systems), which enabled users to keep track of their plant-care, scan plants to identify them or diagnose potential diseases, leading to a happy garden.

Cookly | Recipe App

- Ideated a recipe app that applied the user-centered design process by conducting user-interviews and usability testing which allowed the app to be strictly focused on users' needs and wants, producing significant improvement in their cooking abilities and dietary goals.
